## Nutrient Management Plan

### Practice:

Nutrient Management Plan

### Benefits:

Improve surface and groundwater quality

Improve soil tilth

Reduce fertilizer inputs

### Partners:

NRCS

### Watershed:

Cannon River

### Sub-Watershed:

Trout Brook

**Project:** Nutrient management planning involves managing the amount, source, placement, and timing of applications of manure, commercial fertilizer, and soil amendments to improve and protect soil and water resources, while maintaining crop production. A nutrient management plan for has been developed for a total of 561 acres.

**Funding:** The Natural Resources Conservation Service's Environment Quality Incentives Program (EQIP) will provide \$4.00 per acre per year, for 3 years, for the development and implementation of a nutrient management plan (NMP). The SWCD's IPP Program will provide an additional \$4.00 per acre per year, for a maximum of 250 acres and 3 years. The SWCD will provide payments in two lump sums: the first payment is made when the NMP is developed, and the second payment is made when the NMP implementation has been certified by SWCD staff.
